Supprimer compte Microsoft Online

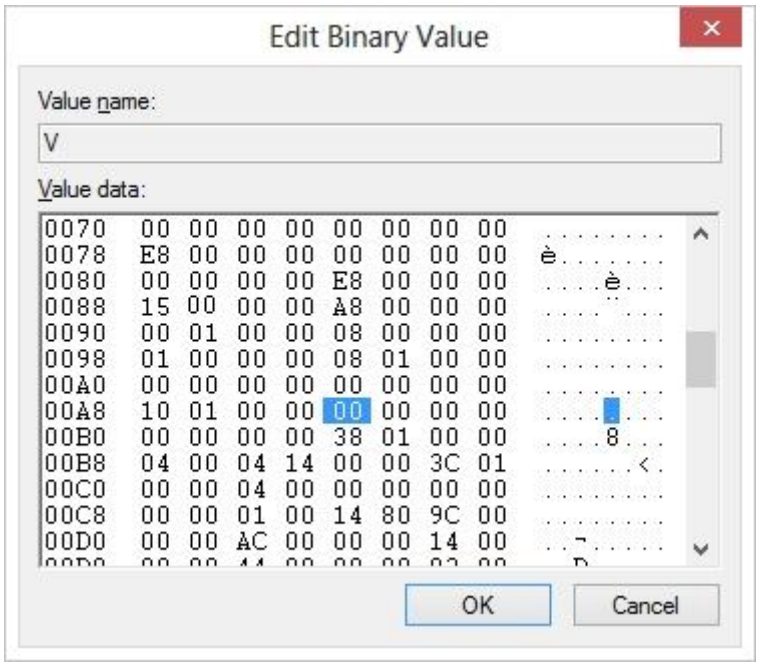
Mount regedit key *windows**system32**config****SAM***

Make sure you backup the Keys you change!

1. HKEY_LOCAL_MACHINE\SAM\SAM\Domains\Account\Users\Names
2. Select the Name you want to convert and look at the Default Value it will say something like 0x3F5
3. HKEY_LOCAL_MACHINE\SAM\SAM\Domains\Account\Users\
4. Select the 000003F5 Key (Choose the one that has the same numbers as you just saw)
5. **Delete the following Values but be sure to keep "V" and "F". Important that you do not delete "V" and "F"**

```
InternetUserName
InternetProviderGUID
InternetUID
InternetSID
CachedLogonInfo
```

6. Select the "**V**" Key



7. Go to **00A8** in key "**V**", select the 5th Byte and change it to **00**
8. Create a "ForcePasswordReset" DWORD Value and set it to 1, now you get Asked to change your Password when you login, but you don't have to type any password, just click OK
9. **Done**
